SUBJECT: Engineering Report Amendment Approval
Western Wake Partners
Amendment No. 1
Revised Influent Wastewater
Characterization & Effluent
Speculative Limits
Project No.: CS370908-01

Dear Mr. Brown:

The Construction Grants and Loans Section of the Division of Water Quality has completed its review of the subject Engineering Report – Amendment No. 1 Western Wake Regional Water Reclamation Facility Revised Influent Wastewater Characterization & Effluent Speculative Limits. The proposed amendment addresses the infrastructure and operational changes from the approved engineering report as a result of the revised speculative effluent limits and revised influent wastewater characterization design criteria for the Western Wake Regional Water Reclamation Facility. These changes include; additional aeration capacity, supplemental carbon fed to the biological treatment process, and supplemental alkalinity. The amendment also includes the addition of a bulk reclaimed water facility.

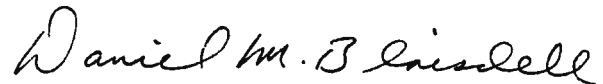

The subject engineering report amendment is hereby approved.

Please note that the milestones below must be met to maintain assurance of funding under the Clean Water State Revolving Fund (CWSRF). In the event that any of these milestones are not met, you must reapply under the new, competitive priority system if you wish to seek CWSRF funding for this project. We will be accepting applications twice per year, and projects will be funded based on priority and availability of funds.

Permitting and P&S approval must be completed by:	May 2, 2011
CG&L's Authority to Award must be issued by:	August 1, 2011
Construction contract(s) must be executed by:	September 1, 2011

If you have any questions concerning this matter, please contact Michael W. Leggett, P.E. of our staff at (919) 715-6208.

Sincerely,

Daniel M. Blaisdell, P.E., Chief
Construction Grants & Loans Section
